

Required Clothing List What to Bring on Course

Packing for Wilderness Travel

Wilderness travel means you can and, for your comfort, should carry a lot less than you do in the regular world; most experienced wilderness travelers will tell you that they bring about the same amount of gear on a three-day trip as they would on a three-week trip.

Your COBS Packing List:

- Colorado Outward Bound School provides other necessary equipment not on this list, including **stoves, sleeping pads, sleeping bags, backpacks, cookware, sleeping tarps, ropes.**
- There are no additional fees for the use of our equipment, but if our equipment is lost or damaged beyond normal wear and tear, you will be charged for the replacement.
- Pack your clothing and gear in a duffel bag or suitcase. You will keep personal items such as clean clothes (for your return trip home) and valuables (cell phones, electronic devices, and wallets) in your bag or suitcase while you are on course. These items are kept at our base camp facility in a locked storage area while you are on course. Please leave unnecessary items at home.
- Once on the course, your instructors will help you select from your luggage the best combination of items for you. They will assess your personal gear, the group gear you will be required to carry, and then balance it against your pack weight, physical size, and temperature for the time of year.
- Since this list must accommodate ALL the weather conditions you may encounter and consider the wide range of individual preferences and body temperatures of our students, it is very likely you will not use every single item on this list. One option is to leave the tags on any items you purchase for this course in the event they were not used on the trip and you would like to return them but please note your retailers' return policies!
- **Please bring everything on the list!** If there are items not mentioned on this list you feel you will need, or you have concerns about cost and want help strategizing for less expensive options, call and ask your course advisor.

Clothing Systems:

- **Layering:**
 - *First layer*—This layer is worn next to your skin. Synthetic and wool materials pull moisture away from your body so your sweat won't cool you down too much and make you cold.
 - *Mid layer(s)*— the insulation layer (warm tops, socks, fleece pants). This should be thick fluffy sweaters and jackets that will trap and store the heat your body is producing to keep you warm.
 - *Outer layer*—the shell layer (jackets, pants, rain gear). Adding an outer wind and/or waterproof layer makes sure that the wind does not steal all that built up heat and all your insulating layers do not get soaked.
- **Hard Shell:** These are materials that are waterproof, windproof, and breathable and generally worn when it's raining, snowing, or really windy.
- **Soft Shell:** These are materials that are water and wind resistant, but not always waterproof. They are more breathable than hard shell materials.
- **Fleece:** Great insulator and dries quickly, but not always wind proof. In windy conditions, you'll often wear your hard shell over your fleece to combine the wind-resistance and insulation.
- **Wool:** Natural material that, unlike cotton, keeps you warm when wet. It's a bit heavier than some of the synthetic fabric. As a bonus, wool is naturally odor and bacteria resistant.
- **Synthetic:** Most items listed here should not be cotton, because cotton absorbs water, dries slowly, and steals your warmth when wet. Acceptable non-cotton options are wool, capilene, poly-propylene, polyester, fleece, acrylic, rayon, Polartec, Thinsulate, COOLMAX, and nylon.

Medications:

- All prescription medications must be listed in the applicant's medical record, must be approved by your course advisor prior to course, and must accompany the participant on course. Participants may not be permitted to begin their course without their required medications OR with new medications not approved by your course advisor.
- All medications (prescription, non-prescription, and OTC) must be in their original containers with the prescription label intact. The prescription label is documentation of the dosage directions. If possible, bring a double supply.

What to Wear While Travelling:

We recommend you wear course clothing and boots while travelling and bring all essentials (prescription meds, insurance card copy, cash) in a carry-on. This will minimize the inconvenience in the unlikely event your luggage is delayed in transport. Being dressed for course will also further the efficiency on your first day, especially since front country bathrooms and private changing areas are rarely available.

Items Not Allowed On Course:

- Electronics—cell phones, iPods, etc. These may be brought on the plane or bus but will need to be stored at the base before going into the field.
- Deodorant, makeup, shampoo, conditioner, perfume, cologne, etc.
- Illegal drugs, marijuana, alcohol, vaporizers, and tobacco products of any kind.
- Any prescription drugs not cleared by your course advisor.
- Weapons of any kind.

Weather During Your Course:

Expect temperatures ranging from 40-80 degrees (Colorado) with nighttime temperatures ranging from 15-40 degrees. Despite these recommendations of what is "normal weather," our course environments are characterized by unpredictable weather. Please check the weather prior to your course for Leadville, Colorado at www.weather.com to have an idea of what to expect, but please bring everything on this list since weather patterns can change quickly.

Required Items – PLEASE BRING ALL ITEMS IN THIS SECTION:

Quantity	Item	Description	\$	\$\$
TOP LAYERS				
2+	Sports Bra	Synthetic or Merino wool materials recommended. Camisoles with built-in bra are a great cold-weather option.		
4+	T-Shirts - Synthetic & Cotton	Merino wool or synthetic t-shirt for use as a base layer during physical activity. Synthetic and/or cotton tees for travel and basecamp days.		
1	Long Sleeve Base Layer	Thin, skin layer, synthetic or merino wool shirt.		
1	Long Sleeve Mid Layer	Medium weight wool or expedition weight Capilene®/ 100 weight fleece, etc.	REI	Patagonia
1	Long Sleeve Shirt	Loose, light colored for sun protection at rock days, on the river, or in the canyons. Button up or pull-over sun hoodies; cotton or nylon materials are ok. UPF materials are suggested for individuals more prone to sunburns.	Thrift shop	Black Diamond/ Patagonia
1	Fleece/Softshell/Thin Puffy Jacket	200 or 300-weight fleece; or a thin synthetic puffy jacket. Options for this layer provide a variety of warmth-to-weight ratios, durability, and costs. A hood is recommended.	REI Hyperaxis Fleece	Patagonia Nano Puff
1	Puffy Jacket	700 or 800-fill expedition weight, synthetic or down, thick puffy jacket with a hood.	Rab /Outdoor Research	Patagonia/ Black Diamond
1	Waterproof, Breathable Rain Jacket	This layer should have a Gore-Tex or other waterproof coating that stops outside moisture from entering; must fit over all your other layers including a helmet. **See more detailed notes on rain gear	REI or Outdoor Research	Patagonia/ Black Diamond
Quantity	Item	Description	\$	\$\$
BOTTOM LAYERS				
6+	Underwear	For males, we recommend briefs or boxer briefs. For females, we recommend at least one pair of cotton nighttime underwear for breathability. Synthetic, quick drying underwear for daytime activities and cotton for sleeping.	nylon/span dex	Wool
2	Shorts	Quick-drying, athletic shorts; for potential swimming days, and river sections. Lightweight nylon fabric wicks moisture and dries quickly. Board shorts or running shorts work well. Pockets are always nice.	What you have already or Thrift store	REI
1	Climbing Pants	A durable pair of pants for use at rock camp. They should be loose fitting. These pants will get torn up a bit due to the rough nature of rock climbing. Thrift store pants will do just fine and Cotton is okay.		
1	Base Layer Bottoms	Thin, skin layer, synthetic or merino wool pants.		
1	Medium Weight Pants	Mid-weight wool or fleece pants – for keeping warm at camp on cool days and evenings.	REI	Smartwool
1	Insulated Pants	These pants can be down, fleece, or synthetic insulation full side zips on these pants are useful in the backcountry.	Rab or Mountain Harware	Black Diamond Belay Pants
1	Soft-Shell Pants	Medium weight, nylon & polyester, hiking pant; This item will be one of the most used items you bring - for hiking, climbing, hanging out in camp, etc.	REI or Outdoor Research	KUHL or Patagonia
1	Rain-Shell Pants	Similar to your rain jacket, this layer should have a breathable, waterproof coating that stops outside moisture from entering; must fit over other pant layers and ideally has lower leg zips for easy on/off without removing boots. **See more detailed notes on rain gear.	REI or Marmot	Patagonia
Quantity	Item	Description	\$	\$\$
Head & Hand Layers				
1	Baseball Cap or Visor	Necessary for sun protection; full brimmed hats do not work well with backpacks.		
1	Warm Hat	Wool or fleece – no tassels or brims as it must be able to fit under a helmet.		
1	Midweight Glove	Should be insulated and weather resistant. To wear when the temps are a little colder when hiking and in camp		

2+	Face Masks - Fabric Style	To be worn at course start, during social distancing, during travel days, while preparing food, while in close proximity to others, and when requested by COBS staff. Should be washable, consist of at least 2 layers of fabric and securely cover the mouth and nose.		
2+	Face Masks - Tubular Style (Buff)	To be worn when close to others during activities.		
Quantity	Item	Description	\$	\$\$
Footwear Layers				
n/a	Heavy -weight Socks	Heavy Wool or Synthetic - important for very cold days. Make sure new boots are fitted with the thickest socks		
6+	Medium-weight Hiking or Ski Socks	Wool or Synthetic - base hiking sock; ski socks are nice because they pull up to the knees and provide extra warmth		
n/a	Liner Socks	Lightweight, flat-knit provides a close fit for a protective second skin that prevents blisters. Should be worn under heavier socks to prevent blisters. need to be at least crew-height.		
6+	Cotton Socks	For Rock Camps, around camp, and travel days		
1	Approach Shoes	Shoes made for scrambling on rock and in the canyons - Avoid leather shoes in the canyons. MUST HAVE "STICKY RUBBER" ON BOTTOM AND BE DURABLE		
1	Boots	The most essential piece of clothing or gear that you will purchase. * Please see the additional boot document for more guidance.		
1	Rock Climbing Shoes	The classic rock climbing shoe is a close-fitting shoe built with suede leather or a suede and fabric combination upper that is sewn or bonded to a smooth "sticky" rubber sole. Super tight performance fit shoes are not appropriate for Outward Bound courses. The shoe should be snug, with little to no extra room, but make sure this shoe feels good on your foot, because you will spend long days in them. Velcro, Lace-up, or Slip-ons are great. It may help to ask a sales person for a "multi-pitch trad style" shoe rather than a "bouldering" shoe.	La Sportiva Mythos	
1	Running Shoes	This will be your dry, comfortable, camp shoe. It should be somewhat lightweight and sturdy.	old pair of running shoes	
Quantity	Item	Description	\$	\$\$
Personal Accessories				
1	Duffle Bag	Large duffle bag or suitcase for travel to and from course with. Bag should be big enough to contain all of your personal items.		
1	ID & Insurance Card	If you are covered under any medical insurance, please bring your card. The actual card is preferred, but a copy of the front and the back of the card will be okay. Store in ziplock bag.		
2	Bandana	This all-purpose piece of cotton absorbs sweat, cleans off trail-grime and offers a multitude of other camp and trail uses. 1-2 extra for female students on longer courses.		
1	Sunglasses with Keeper Strap	Sturdy & dark wrap-around sunglasses for adequate protection from sun and wind. We recommend a higher quality pair for backpacking in the mountains and river travel, and a cheaper pair for daily use in the canyons and at rock camp.		
1	Prescription Eye Wear + Extra Glasses and/or contacts	Contacts – bring extra pairs, as well as a backup pair of glasses. Glasses - Ensure these are compatible with your sunglasses, or bring prescription sunglasses. Bring an extra set in case of loss or damage		
n/a	Snow Goggles	For winter or spring courses with snow travel activities. Must provide 100% UV protection and some ventilation to reduce fog during exertion.		
2	Water Bottles	Wide-mouth 32 oz. water bottle. A hydration bladder is not recommended for river courses or sections with freezing temperatures. Please come hydrated to course start!	Nalgene	Klean Kanteen
1	Headlamp w/ batteries	LED headlamp with extra batteries - lithium batteries recommended.		Diamond or Petzl

2	Prescription Medications including Asthma Inhalers	THESE MUST BE DECLARED DURING THE APPLICATION PROCESS. Bring 2 sets in their original containers and a ziploc bag for storage on the trail - Please bring these to course start even if you feel they are unnecessary.		
1	Watch	Must have alarm. Water resistant recommended.		
6	Large Zip-Lock Plastic Bags	Heavy duty to protect cameras, etc. from sand and water		
2+	Personal Hand Sanitizer	Minimum of 60% alcohol-based hand sanitizer contained in 3 oz bottles. Plus a larger 16oz to refill if your course is 15-days or longer.		
1	Digital Oral Thermometer w/battery	Small and lightweight for daily temperature checks.		
Quantity	Item	Description	\$	\$\$
Toiletries				
1	Waterproof Sunscreen	SPF 30 or greater. For courses 15 days or longer, consider bringing a small bottle to carry and a larger bottle to resupply from.		
2+	Lip Balm or Chap Stick	SPF 30 or greater		
1	Insect Repellent	2-4 oz., plastic container. Products with Picaridan or DEET (10 - 35%) are most effective. *No sprays or aerosols.		
16oz.	Moisturizing Lotion	4-6 oz. per week for dry feet and hands		
1	Toiletry Kit	Travel-size toiletries for basecamp use.		
	Menstrual Products	Choose the method you are most comfortable with such as pads, menstrual cups, or tampons and include extra/supplemental supplies. Many of our staff love a reusable menstrual cup (MeLuna, DivaCup or Lena), because it reduces the amount of waste that will need to be carried. If you've never used a menstrual cup, we recommend you research and trial it before course. If using tampons, consider a non-applicator tampon to reduce bulk and waste that needs to be carried. Feel free to contact your course advisor with any questions. Regardless of your choice, we are able to share practises for managing periods and supplies in the backcountry and provide all the supplies to manage waste.		
1	Wet Wipes	For extra cleaning and hygiene		
1	Towel	For showering at basecamp.		
Quantity	Item	Description	\$	\$\$
Travel to and From Course				
	Travel Money & Snacks	For longer courses and when traveling from afar, extra cash and snacks are recommended for first and last days of course, as well as transition days. Consider unexpected travel expenses such as luggage fees, bus fare, etc.		
	Emergency Contact Numbers for Travel Delays	Carry a copy of the phone numbers to use in case of travel delays (from the travel and itinerary document)		
	Clean Clothes for the Trip Home	Please bring a set of clean clothes for your travels home		
Quantity	Item	Description	\$	\$\$
Optional Items				
1	Travel Insurance	COBS strongly recommends purchasing travel insurance to protect you in the event of an emergency cancellation or early medical departure. Please speak with your course advisor for details.		
1	Vest	Fleece or other synthetic material – to be worn as an extra layer for core body warmth; some people love them and others do not		
1	Stationary, Stamps & 2 Pens	Bring stamps and envelopes if you would like to send mail. Consider pre-stamping and pre-addressing them before course. Put in a zip-lock bag with paper and pens		
1pr	Gaiters	COBS will provide a basic pair of gaiters. Higher end gaiters are nice to have and are easier to use. Tall gaiters recommended for mountain sections. Ensure they're fitted over your boots.		Outdoor Research or REI
1pr	Trekking Poles	COBS provides basic poles for all backpacking sections. You may choose to bring your own pair if you experience knee problems, want more stability on the trail, or have trekking poles you prefer to use. Spring-loaded, adjustable length poles provide the best versatility and comfort.		

1	Camera	Most people bring small, digital cameras or disposable 35mm cameras. Large cameras (SLRs, for example) are heavy, bulky and difficult to protect in the backcountry. Bring multiple cameras if disposable. If bringing a non-disposable camera, consider taking extra precautions like putting it in a Ziploc bag or Pelican hard case to keep out dirt and sand.		
3+	Ear Plugs	Recommended if you are a light sleeper.		
1	Thermos	½ liter size, maximum. Can be really nice for mid-day hot drinks.		
1	Toys, Instruments, Books	You are welcome to bring hacky sacks, frisbees, musical instruments, and other fun stuff - just know that for all or some parts of the course you may not have access to these things.		
1	Cell Phone & Charger	You may have opportunities to use your phone and listen to music, or use during travel to and from course.		
1	Inflatable Sleeping Pad	COBS provides an insulated foam pad. Inflatable sleeping pads provide more comfort and lumbar support. Must be a lightweight, backpacking pad, with the appropriate R-value for the cold. If electing to bring an inflatable pad, please bring a patch repair kit.		Therm-a-Rest
1	Crazy Creek Chair	Crazy Creek and REI are popular brands. No chairs with legs can be brought! Must be lightweight and packable/rollable		
	Climbing Gear: Helmet, Harness, Belay Device, or Climbing Chalk Bag	COBS provides basic models. If you already have your own, bring them. If you are sure you will continue to climb after this course, you may want to go ahead and invest in these items. If you are new to climbing, we recommend getting your instructor's advice about this gear.	Black Diamond/ Petzel/ C.A.M.P	
1	Water MicroFilter	COBS disinfects backcountry water with Aquamira, bleach, or by boiling. If you prefer to filter your drinking water and wish to bring your own, it must be effective at filtering both giardia and cryptosporidium.		MSR SweetWater /Katadyn Hiker Pro Microfilter

Information on Rain Pants and Jackets**

After footwear, rainwear is the most critical part of your clothing system. It can make or break your experience. If you have to cut costs elsewhere to invest more in rainwear, we recommend doing that. In general, you get what you pay for in rain gear.

All rainwear should be a **WATERPROOF AND BREATHABLE** fabric, not merely water resistant. It must have a hood. Gore- Tex, a brand name fabric that many manufacturers use, comes in differing layer amounts, from 1 to 3-layer. 3-layer is the waterproof version, and the most expensive. For this course, 2.5 layers or 3 layers are recommended. Many companies make their own version of this waterproof, breathable fabric that is of high quality. For example, REI uses eVent; Patagonia uses H2no; and The North Face has Hy Vent. Please call your course advisors if you have any questions regarding proper rainwear for your course.

Here are some examples of acceptable rain jackets, and approximate retail prices.

- **Patagonia Torrentshell** - \$129
- **REI Rhyolite Jacket** - \$189
- **Outdoor Research Foray Jacket** - \$215
- **Outdoor Research Clairvoyant Jacket** - \$325
- **Marmot Knife Edge Rain Jacket** - \$225

Here are some examples of acceptable pants, and approximate retail prices.

- **Marmot Precip Pants** - \$100
- **Patagonia Torrentshell Pants** - \$99

For more rainwear info: <http://www.rei.com/learn/expert-advice/rainwear-how-it-works.html>

Gear that Outward Bound Provides

Please note Outward Bound provides all other equipment including but not limited to sleeping bags & pads, backpacks, camp gear. There are no additional fees for the use of our equipment. If you have your own equipment and it meets the below criteria, you are welcome to bring it with you. Please be aware that your instructors will assess it for appropriateness and may ask you to use Outward Bound gear in lieu of your own if they do not find your gear adequate for your particular course.

If you **DO** wish to bring some of your own gear, here are our minimum standards for what **MAY** be acceptable for few common items.

- **Sleeping bags** – need to have a 15-degree warmth rating or warmer. Synthetic filled bags have the advantage of being warm even when wet. Down-fill sleeping bags are not appropriate for this course due to the wet conditions found in the backcountry. Should weigh less than 5 lbs. **Big Agnes** is a recommended brand.
- **Sleeping pads** – can be ¾ to full size in length. They can be made of closed-cell foam or be inflatable. If you bring an inflatable pad you must bring a patch kit as well. Inflatable pads **MUST** have insulation. **Big Agnes** is a recommended brand.
- **Expedition Backpacks** – need to have a minimum capacity of 80 liters, should carry 45-60 lbs. comfortably. Side pockets are also a useful option. **Osprey** is a recommended brand.
