

Required Clothing List – What to bring on course

Packing for wilderness travel

Wilderness travel means you can and, for your comfort should, carry a lot less than you do in the regular world; most experienced wilderness travelers will tell you that they bring about the same amount of gear on a three-day trip as they would on a three-week trip.

About this List

This list is very broad. It is designed be a complete stock of all possible ideal combinations of clothing; enough stuff to pack “heavy” and keep you warm if temperatures are a bit on the cold side of normal but varied enough to pack “light” and carry fewer items if it is hot. Once on the course, your instructors will help you select from your luggage the best combination of items for you; they will assess your personal gear, the group gear you will be required to carry, and balance it against your pack weight, physical size and temperature for the time of year.

Because the list has to accommodate ALL the weather conditions you may encounter and consider the wide range of individual preferences and body temperatures of our students it is very likely you will not use every single item on this list. We suggest **leaving the tags** on any items you purchase for this course that, in the event it was not used on the trip, you wouldn't want to keep, but please note that you should be aware of retailers' return policies!!!

Please bring everything on the list! If there are items not mentioned on this list you feel you will need, or you have concerns about cost and want help strategizing for less expensive options, call and ask your course advisor. Companies such as Patagonia, Mountain Hardware, NRS, REI and many others make high quality outdoor apparel. However, you don't need to buy all expensive name brand clothing. You can shop at thrift stores, Army Surplus Stores, second-hand outdoor stores like the Wilderness Exchange or Play It Again Sports or overstock merchants like Sierra Trading Post (www.sierratradingpost.com) or Campmor (www.campmor.com) and get nearly everything you need at a fraction of the cost.

Weather during your course

Expect warm spring and fall temperatures (55-80) while nights are significantly cooler (30-55 degrees at night). Most days are beautiful with blue skies, but winds can occasionally be high in the daytime during the spring, although they usually settle down overnight. As good as the weather normally is, our course environments are characterized by unpredictable weather—it can get cold any time of the year. Feel free to check the weather for Moab, Utah prior to your course to have an idea of what to expect, but **please bring everything on this list** since weather patterns can change quickly. Once you arrive at course start, your instructors will update you on current weather patterns and what is appropriate for the current weather patterns.

PLEASE BRING ALL ITEMS IN THIS SECTION: You are welcome to bring extras of the items marked with a plus (+) sign. There are multiple brand name options available at varying prices. Please ask your local outdoor retailer if you have specific questions or for alternative brands. This list is to prepare you for extremes in temperature that often occur, but your instructors will let you know exactly what to bring from this list with the current forecasted weather. Remember to keep tags on your items in case you don't use it on course and you can then return those items.

Outward Bound provides all other equipment including sleeping bags, sleeping pads, day packs, dry bags, shelters, and backpacks. There are no additional fees for the use of this equipment, but if you lose or damage something you will be asked to reimburse us for it. If you have your own equipment and it meets the below criteria, you are welcome to bring it with you. Please be aware that your instructors will assess it for appropriateness and may ask you to use Outward Bound gear in lieu of your own if they do not find your gear adequate for your particular course.

If you DO wish to bring some of your own gear:

Here are our minimum standards for what MAY be acceptable for few common items.

- Sleeping bags – need to be made from synthetic materials (down fill is not appropriate for our purposes) and have a 0-degree warmth rating.
- Sleeping pads – can be ¾ to full size in length. They can be made of closed-cell foam (Ridge-Rest or Z-Rest) or be inflatable (Therma-Rest®, Big Agnes, Pacific Outdoor Equipment, etc). If you bring an inflatable pad you must bring a patch kit as well. Remember, inflatable pads usually weigh more than closed-cell foam pads.

If you bring your own equipment, it will be inspected by your instructor at the beginning of your course. If it does not meet our standards you can store it in a secure location during your course.
